

Ultra-large printing format

## Main features:

1. Ricoh Gen6, Ricoh Gen5, Konica, Kyocera industrial grayscale piezoelectric printheads are optional;
2. 5 meters ultra-wide printing format, can also print coils within 2.4 meters at the same time, doubling production efficiency;
3. All-steel precision-processed beam, linear motor with metal grating ruler, make ultra-wide printing extremely accurate;
4. Can print 6 colors plus white, with Yueda special color control printing transfer, make the pattern color full and bright;
5. Front and rear double receiving rollers, convenient loading and unloading, large materials can be put into place quickly.

## Specifications:

Machine model	YD-R5000	Print width	5000mm	RIP software	PhotoPrint
Print head	Ricoh Gen5/Gen6	Number of heads	2-16 (4-8 colors optional)	Print mode	One-way and two-way
Print resolution	600x2400dpi	Media thickness	Up to 50mm	Material type	Roll to Roll material
Print speed	9-52m²/h(Gen5) 15-65m²/h(Gen6)	Input format	PDF JPEG TIFF EPS AI	Machine weight	5000KG
Ink color	CMYK LC LM W V (optional)	Power requirement	220V (±10%) single phase 8.7KW		
Ink type	Eco-friendly UV curing ink (No VOC)				
Machine size	8600mm[L]x2300mm[W]x1900mm[H]				
Working environment	Independent clean low dust low light good ventilation ambient temperature 18°C~30°C relative humidity 30%~70%
